

Epicos project

Epicos is the leading international e-business platform for the Aerospace and Defence industry - providing Information Services and Tools to identify and process Business Opportunities on Procurements, Offsets Projects and Industry Co-operation. Epicos provides Aerospace and Defense industry intelligence to the sector's solution providers as well as products and services to better help them drive new business opportunities and generate revenue in a streamlined and easy to use manner.

The Epicos.com site is a specialized and secure portal/e-marketplace which brings together the majority of the Aerospace and Defense industry (subcontractors, government agencies, service providers and more) and enables them to conduct business processes online with special focus on the following:

- Aerospace & Defense industry intelligence on tenders, offsets, issues, changes to the market and other matters
- Access to an international network of Aerospace & Defense suppliers & contractors for specialized services, via the Epicos Business Desk
- E-procurement, e-sourcing and e-collaboration services, via the Epicos /Exostar partnership.

The Epicos member community is growing exponentially and includes major Aerospace and Defense companies, Governmental Organizations and more. In addition, the Epicos Platform is adopted by various governments such as Austria, Brazil, Chile, Czech Republic, Finland, Greece, Hungary, Israel, Lithuania, Malaysia, Netherlands, Portugal, Slovenia and Switzerland for the integration of their local Aerospace and Defense Industry in Block Deals. Furthermore, Epicos offers a new and unique service, "Project Opportunities", providing, online, a set of tools enabling the identification, structure and implementation of comprehensive Offsets programs.

Epicos Milestones:

- Creation of a unique, one-stop intelligence shop for the International Aerospace & Defense Industry.
